

New RMS Honorary Fellow Announced

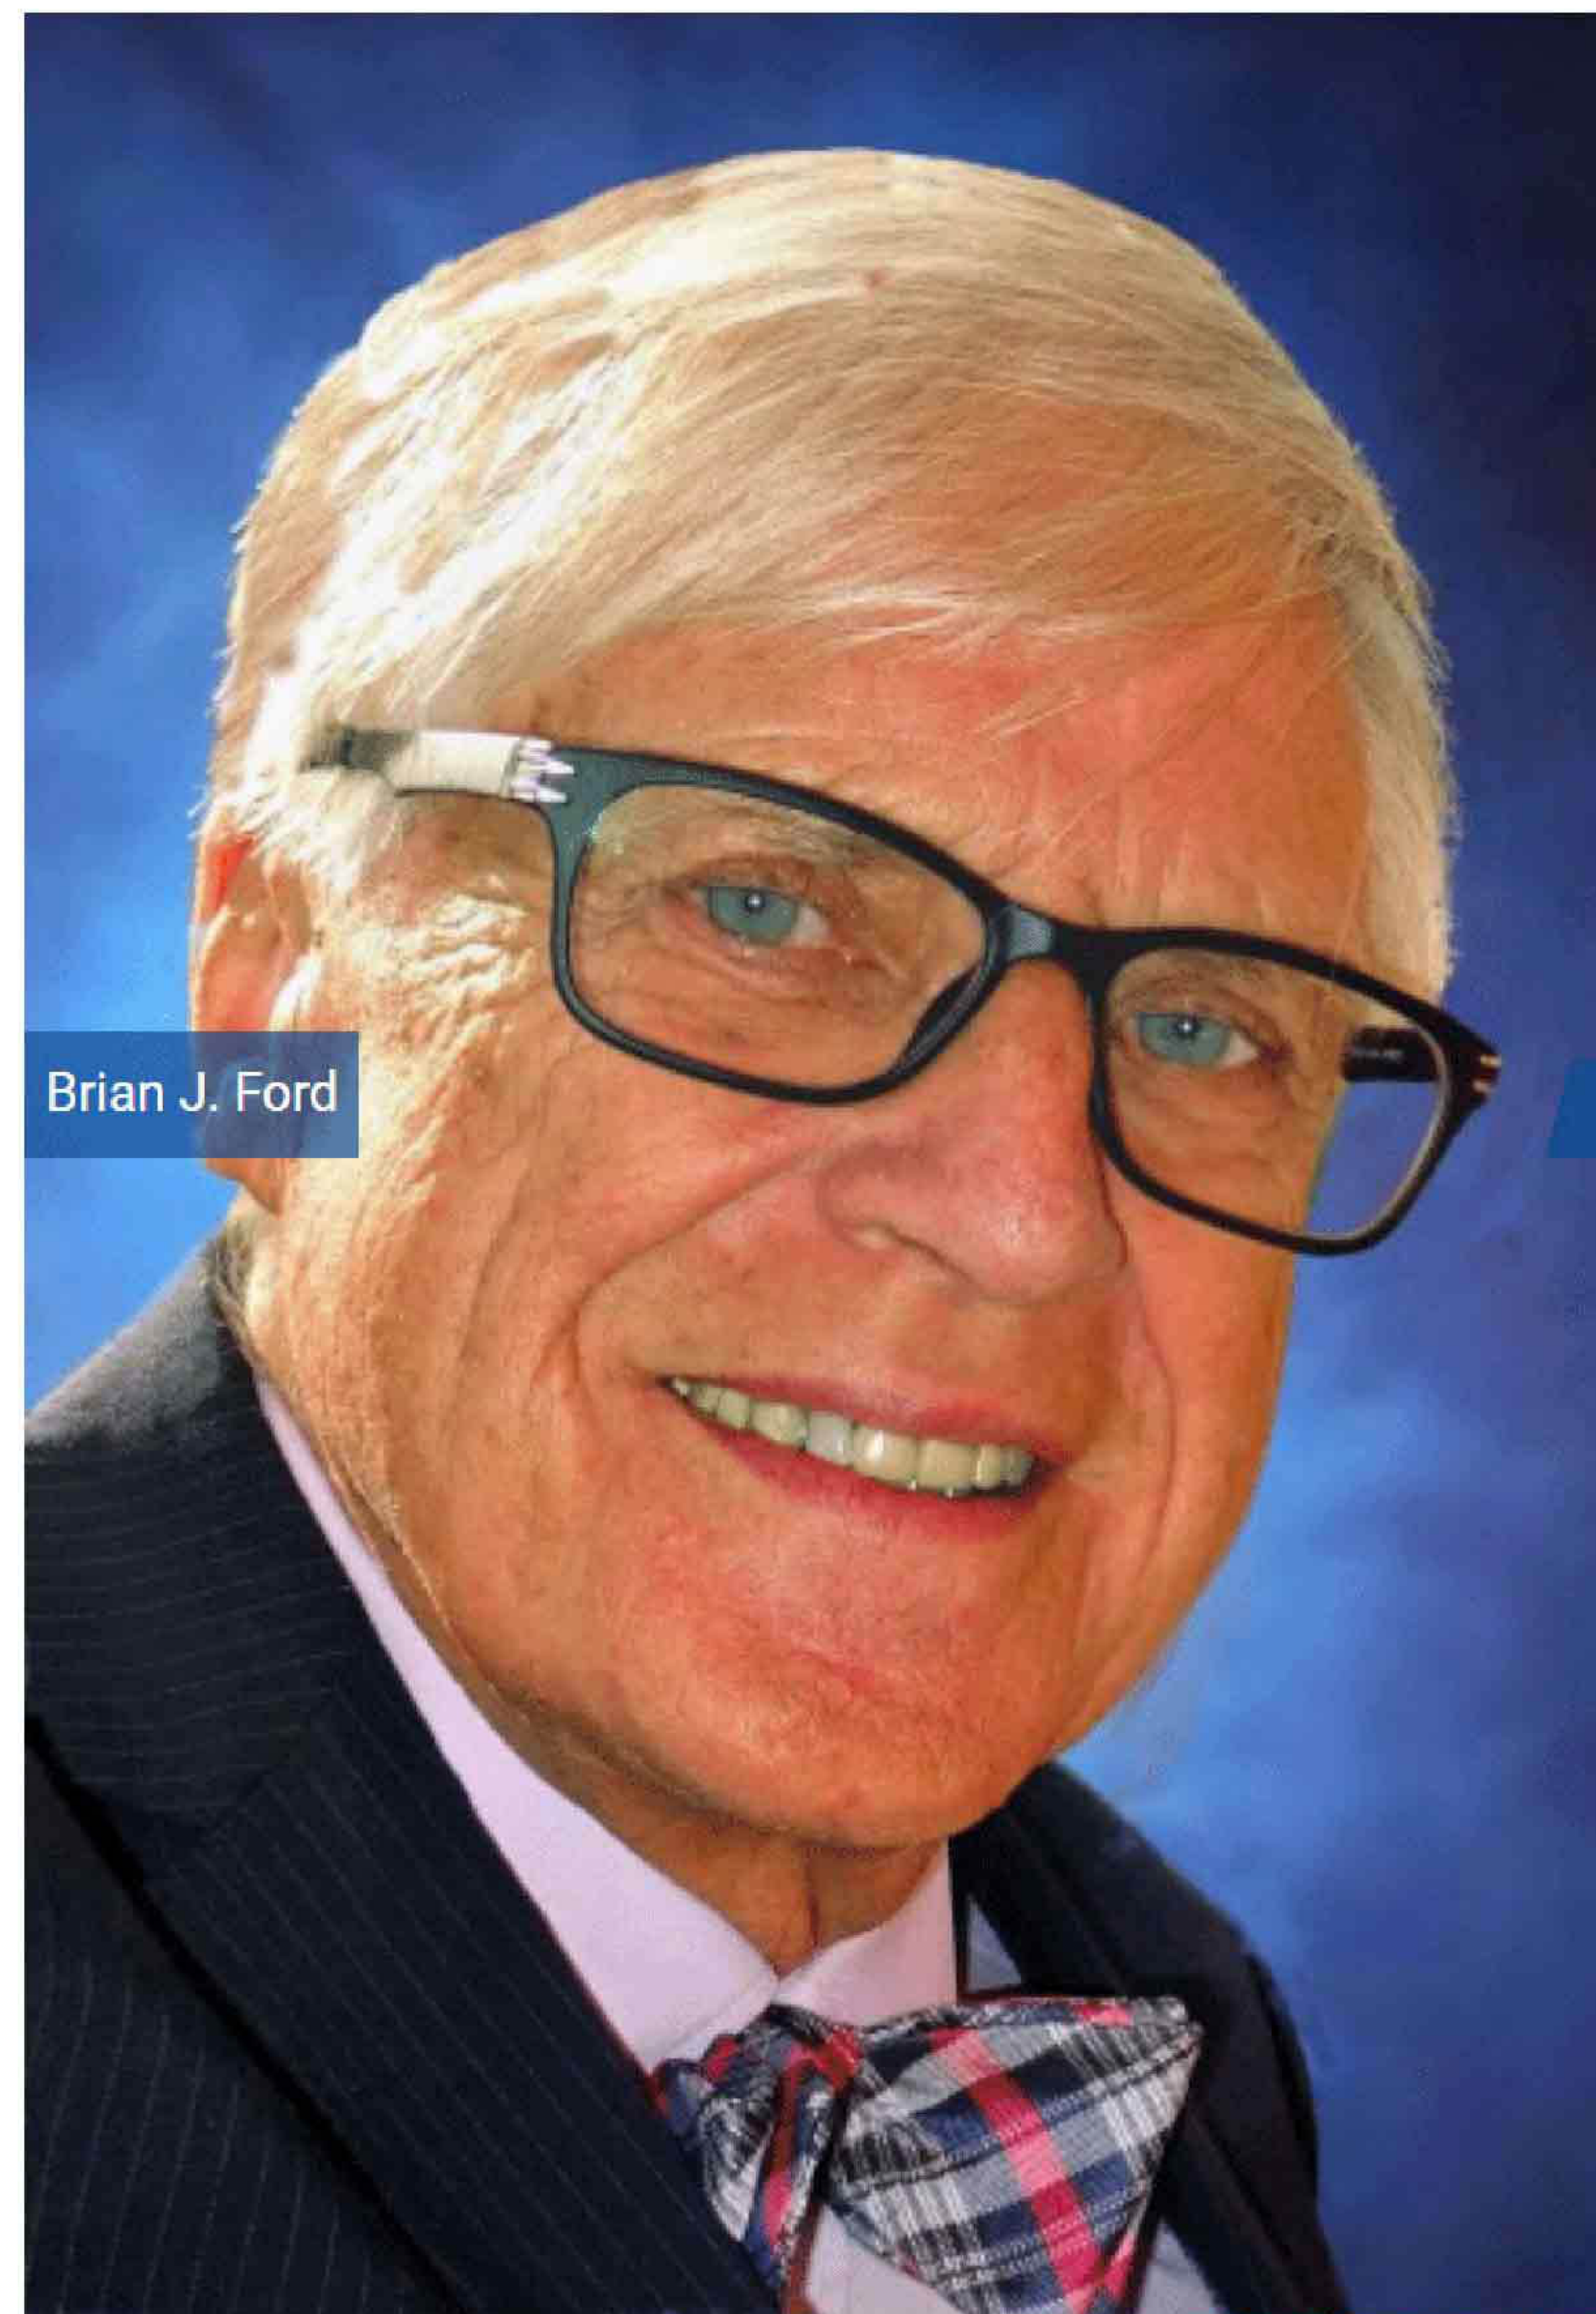

Request information

Mar 28 2017

The Royal Microscopical Society has announced Professor Brian J Ford as a new Honorary Fellow of the Society.

Professor Ford is a microscopist and former chartered biologist who has made a significant contribution to microscopy and biology and to the popularisation of these fields; a resident in Cambridgeshire, he is known internationally for his thought-provoking lectures, books and broadcasts.

Professor Ford began his studies in botany and zoology at Cardiff University in 1959, leaving in his second year to set up his own laboratory. His early work was in plant physiology, publishing in *Nature* a theory on plant excretion which gave rise to the new science of phytoremediation. He has published on the microscopy of forged photographs, food science, microbiology, forensic analysis, cell microscopy and blood coagulation, to name just a few and is currently publishing on the complexity of the living cell.
